“The collection of coins has not only become an infatuating and engrossing pursuit among thousands of persons of all ages and either sex, but out of it has grown up an extensive trade, furnishing the means of livelihood to numerous individuals in all our large cities. Prices have risen a hundred fold, in some cases almost incalculably; unreasonably; and speculation has been rife . . .

(from The American Journal of Numismatics, Vol. 1, No. 1, May, 1866.)

OUR TERMS OF SALE

1. All coins are guaranteed genuine. I will replace or issue a refund for any coin found not to be genuine. This is a lifetime guarantee. Over ten years of business I have never had to make good on this promise. But I make it anyway for your protection.
2. All attributions are guaranteed correct. Also a lifetime guarantee. I will issue a refund or if available provide a replacement for any coin found to be mis-attributed.
3. A full thirty day return privilege is allowed on all purchases. Returns may be made for any reason, or for no reason. My business depends on attracting repeat customers. It does neither one of us any good for you to keep a coin with which you are not completely satisfied. I am confident that the overall quality and value of the material I offer here is second to none. This does not mean that you might not order a coin that fails to satisfy your personal taste or desire. It is even possible for me to have missed a defect or to have been optimistic about the grade. It can happen. But it is not my intention. I encourage you to use the thirty days as an approval period. Feel free to show your purchases to other knowledgeable EAC members. Get a second opinion. All sales are final after the thirty day period, though I will certainly consider an extension upon reasonable request.
4. Approval service is also available to established clients. Seven days inspection is allowed on approval service at which time the coin must be returned or funds remitted. Approval sales are considered final after the seven days. Extensions are available upon request. We also accept VISA or MASTERCARD.
5. All orders are sent postpaid.
6. Strict ANA and EAC guidelines are followed in grading.

In addition to strict ANA and EAC guidelines I have introduced “value” or “net” grading into my descriptions. Sharpness or technical grade according to ANA standards is fairly easy to describe with consistency. However most old copper coins have acquired defects over time that detract from the overall desirability of the coin. I describe these defects and deduct from the technical grade based on their presence. As an example a coin might be described: “1805 S-267 VF20. Sharpness of VF30 with smooth brown surfaces, some light pinscratches where corrosion was removed

at K1 reverse." Here is a coin VF30 by ANA standards but with scratches at one o'clock on the reverse. Plainly the coin would be more desirable were the scratches not present. I describe the defects and deduct ten points from the overall grade. The first grade listed represents the net or value grade. Clearly this is an art and elements of subjectivity are inevitable. Where there is no second grade listed it is my opinion that the net grade is the same as the sharpness grade. Perhaps not perfection but whatever marks present have been judged to be consistent with the technical grade of the coin and do not detract from the net grade. The intent is for you to have as close an idea as possible of the overall condition of the coin you may wish to purchase. No unpleasant surprises!

7. I attempt to give a rarity rating for each variety listed. These in large part reflect the current EAC rarity ratings as compiled in Jack Robinson's Copper Quotes. I also offer opinions relative to condition census ratings, die state, and condition rarity. These change constantly as new coins are discovered and reported. I attempt to use the latest data or information available. Still these ratings cannot be 100% accurate and remain a matter of opinion only. Having said this I can also say with confidence that more information and more research is available on Early Copper than any other area of American Numismatics. Large cents have been actively collected and researched for more than one hundred years. One can therefore have a high degree of confidence in the general accuracy of current information. I urge all my clients to form the numismatic library necessary to allow them to make informed judgements and purchasing decisions. It is foolish to invest money in coins if you have not already invested in the books and other sources necessary to the full enjoyment of them.

8. I have yet to meet anyone who has bought coins merely as an investment who has realized a net return upon liquidation. I have, however, met numerous serious collectors, who having formed a discriminating collection over a period of years realized a substantial profit when their collection was ultimately sold. Most collectors find that the enjoyment, education, and friendships formed as a result of their collecting pursuits have been their greatest reward. It is much easier to lose money quickly than to make money quickly in rare coins. If you are not willing to undertake the educational process necessary to make well informed decisions regarding your collection you will almost certainly lose. Coin dealers are often more than willing to give investment advice. As my good friend Jack Robinson (whose collection did very well for him when it was sold in 1989) likes to say: THINK ABOUT IT! When you ask a cat which canary to buy remember his first concern may not be how well it sings. There are many opportunities to do well financially in rare coins. But as with any other medium of investment, success is the result of a combination of knowledge, good timing and the ability to wait for the right time to sell. Commit yourself to the process of becoming an educated collector and you stand a good chance of success.

This is my annual Holiday catalog so take a 10% discount off everything in the catalog. A few items are marked net, but everything else is 10% off including books.

This catalog represents the finest group of half cents I have ever offered. Included are two examples of 1796 C-2 as well as two examples of 1796 C-1! Also, an 1806 C-3 and a remarkable run of half cent proofs.

Large cents are well represented also with numerous purchases from the Bob Vail, William Carmel, and Mac MacDonald Sales offered here for the first time. I hope you can find something to add to your collection. You will notice a nice selection of colonial coins representing my purchases from the just concluded Colonial Coin Collector's Club Sale in Boston. See prices realized in back. Also, the prices realized for our September Long Beach Sale are included.

Our next sale is scheduled for Feb 8, 1998 to be held in association with Superior Stamp and Coin in Beverly Hills, CA. Select consignments can be accepted for this and future sales scheduled for June 1998 and September 1998.

1773 VIRGINIA HALFPENNY-PERIOD AFTER GEORGIUS MS65 \$1200.00
120.5 gns. This is not a typical mint state Virginia Halfpenny. It has no toning spots, in fact it has no toning. It is 100% full mint red and it is brilliant. An absolute GEM example.

1787 MACHIN'S MILLS V.17-87A (R-2) VF35 112.1 gns \$550.00
The obverse is a glossy and lovely chocolate brown. Some faint pre-strike planchet roughness at the center, but minimal, and with no surface marks. Ex 97 C-4:107.

1785 CONNECTICUT M.3.3-F.3 MBR (R-4) VF20 122.8 gns \$350.00
This is the Perkin's duplicate coin, lot 2087 from Stack's 3/93 sale. Olive brown, slightly brighter at some raised points. Each side has a scattering of small flaws, most being through the obverse hair and neck. Ex 97 C-4:139.

1785 CONNECTICUT M.5.5-FS R4 VF20 136.8gns \$450.00
Light brown. Smooth surfaces. Few minor plan flaws but nice for issue. Date readable.
Nice example of the mailed bust right. Ex. Barnes:188.

1786 CONNECTICUT M.5.2-L MBL (LOW R-6) VG10 \$225.00
146.8 gns. This is actually among the strongest examples offered in years and quite respectable
for the variety in general. Medium olive brown with a fairly smooth look to the naked eye,
though lightly porous on examination. Late die state. Ex 97 C-4:148.

1786 CONNECTICUT M.5.8-H.2 MBL (HIGH R-5) EF40 \$2200.00
144.4 gns. A beautiful coin with an impeccable provenance. This is the Garrett coin, which
previously resided in the collection of Sylvester S. Crosby. It is boldly struck with light
brown glossy surfaces. It is now considered to rank third in the condition census behind the
uncirculated Ex Hall/Hessberg coin, lot 1363 Stack's 6/91 sale, and behind the flawless EF
Oechsner coin. A lovely coin, an important coin, and one that provides a direct link to The
Early Coins of America. Ex 97 C-4:153. B & R 10/80 Garret Collection Part III Lot #1348
ticket provided with this coin.

1786 CONNECTICUT M.5.11-R MBL (HIGH R-6) VG8 \$135.00
121.3 gns. Predominantly light chocolate brown with subtle mottling of a darker color. Ex
97 C-4:154.

1787 CONNECTICUT M.1.1-A MBR (R-3) F15 123.9 gns. \$350.00
The Small head/ETLIB INDE Type. Dark olive brown. There is some trace porosity.
Unclipped and problem free. Ex 97 C-4:156.

1787 CONNECTICUT M.4-L MBL (R-1) VF20 106.7 gns. \$450.00
The "Horned Bust". Dark olive brown, some glossy surfaces. Full horn though not its latest
state. Two light pin scratches.

1787 CONNECTICUT M.9-D MBL (HIGH R-5) VF25 120.3 gns \$750.00
Dark olive brown. Surfaces generally smooth with a few small rougher patches. Struck high
on the obverse with the tops of a few letters lost as a result. The reverse is struck low, but
less so, with only the top of the date showing. A roughly horizontal scratch across Liberty's
chest being fairly deep. Likely to be among the finest 5 or 6 known. While researching
M.9-D with Connecticut specialist Robert Martin we had an interesting realization. In
reviewing over 30 examples in his exhaustive data base he could find record of only two
plated appearances of this variety. Even Breen, though he gives M.9-d its own Breen
number (#772), lacks a plate of this variety which seems not to often inspire cataloguers.
Ex 97 C-4:169.

1787 CONNECTICUT M.13-g.1 DBL (R-5) VF35 139.8 gns. \$900.00
By almost any standard this is an unusually nice example of this variety, showing little true
wear and original surfaces, and may well be in the condition census. Light chocolate brown
and glossy, with a subtle darker ring at the back of the obverse head and a shallow dig. The
surfaces are smooth with a few scattered striae, and there is one reverse pin scratch from
the rim at 1:00 to the base of Liberty's branch arm. Struck low on reverse with date partial.
Ex 97 C-4:180.

1787 CONNECTICUT M.27a-1 DBL (R-6) VG10 135.2 gns. \$175.00
Attractive tan toning and glossy for the grade, the surfaces smooth aside from scattered micro flaws. Ex 97 C-4:183.

1787 CONNECTICUT M.33.17-r.1 DBL (R-2) VF30 124.3 gns. \$85.00
Very strong technical detail but on porous and pitted surfaces. Ex 97 C-4:199.

1787 CONNECTICUT M.33.36-T.2 DBL (R-2) VF20 113.1gns. \$175.00
A "Skeleton Hand" type. An attractive example with smooth and tan semi-glossy surfaces. Ex 97 C-4:214.

1788 CONNECTICUT M.12.1-E MBL (R-4) EF40 113.7 gns. \$1080.00
Traditional rarity rating, perhaps slightly higher. Very late obverse die state, with a major bulge across the entire obverse. The die states might convey surfaces that are rough, in fact they are hard and problem free, displaying exceptional gloss on both sides. Toning is a lovely honey brown. Ex 97 C-4:230.

1788 CONNECTICUT M.16.3-N-OVERSTRUCK ON 1788 MASSACHUSETTS R.1-B
CENT- DBL (R-2 FOR VARIETY HIGH R-6 w/undertype) F12 \$750.00
119.9 gns. Unspectacular though agreeable as a Connecticut copper, highly significant with this undertype. The coin is a fairly light olive brown. The Connecticut design legends and date are clear and full. The planchet is large and slightly oval in shape, widest between Noon and 6:00. The undertype is of the extremely rare 1788 Massachusetts Cent contemporary counterfeit R.1B.Ex 97 C-4:235.

1787 MASSACHUSETTS HALF CENT R.2-A (R-5) AU50 75.9 gns. \$145.00
Glossy light brown surfaces that are free of marks. A bit of pre-strike porosity in the planchet confined to the left obverse, and to a lesser extent reverse rim. A scarce variety that is rare in upper grades. Ex 97 C-4:253.

1788 MASSACHUSETTS HALF CENT R.1-B (R-3) MS62 76.9 gns. \$3500.00
A coin with substantial mint red, perhaps 15% of the reverse has original red with added traces within the left obverse legend. In addition to original color the strike is exceptionally bold. The obverse has a tiny rim void at 6:30, while the reverse has an irregular rim as made between 9:00 and noon. A lamination line runs from the rim at 9:00 through the top of the S's rejoining the rim at 10:30. Ex. 97 C-4:259.

1787 MASSACHUSETTS CENT R.R2b-A (R-2) VF30 147.3 gns. \$350.00
The "Horned Eagle" Type. Medium to dark olive brown. The surfaces have a faintly grainy texture but look smooth to the unaided eye. Ex C-4:262.

1787 MASSACHUSETTS R.2b-A (R-2) VF25 135.1 gns \$750.00
The "Horned Eagle". A lovely example, chocolate brown that is paler at points, and glossy. Essentially problem free other than two short and faint scratches near the upper reverse rim. The horn here is fully formed. Ex C-4:263.

1787 MASSACHUSETTS CENT R.4-D (LOW R-4) EF45 \$1050.00
145.2 gns. This is the Taylor coin, lot #2128 from B & M's 3/87 sale. Olive brown, with sharp detail, hard surfaces. The Taylor sale catalog made no note of a few faint pin scratches on the obverse between the arrow and EAL, and on the reverse from the left rim to the shield and below M. In 1990, when Mike Packard prepared a working draft condition census for Massachusetts copper varieties, this coin ranked fourth. It was exceeded by one AU example in Bowers and Ruddy's 12/80 sale, and a second AU in a private collection, along with another EF45 coin in the A.N.S. collection. Since then, the finest known, Gem UNC Elliasberg coin has come to light, along with at least two other coins that are technically stronger. With the exception of the Elliasberg coin though, none of them have surfaces equal to these. Ex 97 C-4:272.

1788 MASSACHUSETTS R.1-D CENT (R-3) VF30 157.0 gns. \$350.00
Light chocolate brown and glossy, with faint wood grain toning. Ex C-4:276.

1787 NEW JERSEY M.6-D (R-1) EF40 144.3 gns \$1650.00
A lovely coin. This coin has light to medium olive brown, glossy surfaces. Well centered and struck and essentially problem free. It would be extremely difficult to find a nicer example. The new revision of John Lorenzo's condition census for M.6-D includes One Unc, two AU's, and then a number of EF's. Ex 97 C-4:310.

1787 NEW JERSEY M.14-J (R-1) EF45 141.8 gns. \$950.00
A crisp and lovely example, with even light honey brown toning and substantial gloss on choice surfaces. The horse head is bold. Ex 97 C-4:315.

1787 NEW JERSEY M.63-s (R-1) VF20 119.3 gns. \$350.00
A Large Planchet Variety. Pleasing medium to light brown toning, darker towards the right rim of both sides. Smooth semi-glossy and essentially problem free. Ex 97 C-4:373.

1788 VERMONT RR20 VF25 \$550.00
Glossy medium brown. Few tiny reverse pits. Great eye appeal.

1787 FUGIO N.14-0 (R-5) VF20 147.3 gns. \$650.00
Chocolate brown with smooth glossy surfaces with no problems and only minor flaws. None to our knowledge are known above EF with only one or two in that grade. Ex 97 C-4:440.

1785 NOVA CONSTELLATION CROSBY 3-B (R-1)PCGS AU55 \$1650.00
A Pointed Rays variety. A strong and lovely coin with smooth and glossy chocolate brown surfaces. Struck from the significantly scarcer early obverse die state, before die rust formed in the rays above NOVA. This is among the finest known of this die state. Ex 97 C-4:468.

1787 NOVA EBORAC-FIGURE FACING LEFT MS63 137.5 gns. \$5750.00
A highlight of this or any sale. Virtually a perfect coin. A beautiful light brown, boldly and fully struck on hard and brilliant surfaces. There are traces of mellowed mint red in the left obverse legends. This coin fully rivals Elliasberg #59, there called "The Finest Known". Both have full dates. If anything the left legends of both sides are more fully struck on this coin. Ex 97 C-4:310.

1791 WASHINGTON LARGE EAGLE CENT EF40 Baker-15 \$575.00
Dark brown patina overall with a darker spot near the rim at 5 o'clock on the reverse.

1793 WASHINGTON SHIP HALFPENNY BAKER 18 EF40 \$650.00
159.1 gns. Smooth and very glossy surfaces with less of the fine almost "abrasive" roughness one frequently finds in the left obverse fields. Reverse die in typical failing state, with the lip formed at the rim from 4:00 to 5:00, though it is known to progress further. Ex 97 C-4:507.

\$29,500.00

Dark chocolate and tan. The surfaces evenly porous. Clean rims and basically free of major defects. Good overall eye appeal which can rarely be said of examples of this variety. Quite rare. There are presently less than twenty confirmed examples. Ex. George M. Parsons 6/24/14:1945-Joseph Brobston-C.E. Bullowa. Should rank among the top ten specimens known.

1797 C-2 R3 VF30 \$3850.00
Medium chocolate brown with tan devices. Smooth glossy surfaces which are defect free. Dramatically overstruck on a Talbot Allum and Lee token. Some of the skirt line is visible on the obverse at K12 with some letters visible in the dentils. Faint remnants of the head and arm visible before the lower end of the pole and at the rim K3. A substantial amount of the ships rigging is visible on the central reverse with parts of the legend K3-5. A great coin. This coin walked in to the NY ANA Convention. The proverbial white haired lady with a small leather purse brought it the table. She had initially been offered \$50 for it. Though she subsequently obtained a fair and reasonable offer from a prominent New Hampshire numismatist and (soon?) to be famous editor of Large Cent books. This resulted in my having to make an even more fair almost beyond reasonable offer to buy the coin. Oh, well, what's a trip to NY without being outsmarted by a little old white-haired lady!

RARE PROOF 1849 SMALL DATE HALF CENT

1849 FIRST RESTRIKE R6+ PR63

\$7750.00

Very rare series II restrike. Only fifteen examples presently known. So far as I can determine only a half dozen of these are series II with the thicker flan. This example weighs a heavy 86.4 grains. A beautiful coin with sea green fields and frosted devices. There are a few microscopic hairlines visible only under magnification. I believe this to be identical with the Brobston coin.. A very pretty half cent proof. The first example I have ever owned.

LARGE CENTS

1793 S-2 R3 AG3 CHAIN \$1050.00
Steele brown with smooth surfaces. Date gone, a small rim mark K7 obverse. A couple faint old scratches K3. Portrait LIBERTY, full chain fraction and faint but readable legends. Nice color and surfaces.

1793 S-3 R3 AG3+ CHAIN AMERICA \$1575.00
Smooth, clean surfaces with all devices visible though worn smooth at their tops. However, only the top half of 793 in the date can be seen. Medium steel gray with a tan area through the date where excessive rubbing was done to improve its visibility. Choice for grade. Ex. John Keyes 7/91.

1793 S-4 R3 G3 CHAIN \$ 975.00
Sharpness of about G3 but the date has been re-engraved and the edge filed. On each side is an edge defect and the reverse has some small nicks. Medium dark steel brown. Chain? Most legends sharp.

1793 S-11c R3 AG3 \$ 475.00
Light brown but probably cleaned and retoned. Smooth surfaces. Date readable and LIBERTY. Full portrait. Only portion of reverse wreath and legends visible. Nice for grade.

1793 S-11c R3- F12 \$2750.00
F15 Lovely medium tan to brown color with smooth surfaces that retain their gloss. Well centered with a sharp even strike. There is a tiny lamination void near rim above R of LIBERTY, another larger one in field before Liberty's neck. It is becoming increasingly difficult to locate this quality of wreath cent.

CHOICE 1793 S-11c WREATH

1793 S-11c R3- VF35 \$9500.00
Choice mix of tan and brown with smooth lustrous surfaces. A few minute handling marks visible under a glass, but virtually flawless. Very difficult to locate in this condition.

1793 S-13 R4 AG3 LIBERTY CAP \$1375.00
Two beads are directly over the I in LIBERTY, and the leaf under the ME in AMERICA runs parallel to those letters and points to the adjacent A. Smooth, even wear with a tiny rim bump beneath the date and virtually enough detail for full Good.

1793 S-14 R5 AG3 LIBERTY CAP \$1950.00
The surfaces have light porosity in the fields of the obverse, a bit more on the reverse. Quickly identifiable by the sharp vertical bisecting crack on the obverse, the date is faint while the balance of the obverse devices are clear.

1794

1794 S-19b R4+ F12 \$3200.00
F15 Dark chocolate and tan. A tiny bump under 4 of date. A tiny void in flan K2 obverse. A tiny nick at rim K9 reverse. Good eye appeal. Scarce in all better grades.

VF25 Even chocolate brown surfaces very finely granular but free of marks. Scarcer variety.

1794 S-45 R5 AG3
\$ 650.00

Light brown in color and better than one would expect for the grade. Some surface marks, two neck nicks, one below the eye, a minor rim mark or two, and a pair right of the I in LIBERTY. Ex Schoentag Sale, McCawley-Grellman 1/96:150.

1794 S-47 R4 F12 \$ 700.00
F12 or thereabouts. This is a highly unusual cent struck on a thick planchet with a double profile on the forelock and forehead. While perfectly centered with a strong, bold border, the outside perimeter of the obverse and the central area of the reverse are extremely weak, so much so that the last three numerals of the date are almost indiscernible. Opposite the neck is a small planchet defect, both sides exhibit numerous tiny handling marks and the entire edge has been filed. Darkish steel brown. Cracked reverse die. Ex. Virgil M. Brand-New Netherlands Coin Co-New Netherlands Co. #41 9/53:234-Robert J. Kissner-Ray Bolduc (Sierra Numismatics) 7/86-Robert E. Vail 11/21/88-Del Bland.

1794 S-51 R5- VG10 \$ 550.00
F15 Medium chocolate tan having been nicely recolored. Some digs under CAP in obverse field K9. A small void bottom of right ribbon end. Smooth surfaces which is unusual for this variety.

1794 S-60 R3+ VF20+ \$1400.00

1795 S-74 R3 G4 LETTERED EDGE \$ 250.00
Full rims on the obverse, a bit weaker on the reverse but nearly all the devices are visible. The rims, fields, and devices are generally free of significant handling marks. Nice brown color. Ex. EAC #7 1/93:39. significant handling marks.

HALPERN 1795 LETTERED EDGE

1795 S-75 R1 AU55 \$9500.00

1795 S-78 EX PARMELEE-NEWCOMB-HALPERN-NAFTZGER

1795 S-78 R1 MS60+ \$ 8500.00
An outstanding coin . The surfaces are tan and lustrous. Boldly struck, slightly off-center toward Liberty's cap point, on a decent planchet. Identifiable by a minute tick mark on Liberty's temple, and by the errant centering confirming that this is the Parmelee-Newcomb specimen. Although many choice mint state examples are known, few have the illustrious pedigree that this coin has, and few could have any better surfaces or color. Ex. Lorin G. Parmelee (New York Coin & Stamp 6/1890:712)-J.F. Anger-Howard R. Newcomb-J.C. Morgenthau & Co. #458 2/45:82-Joseph H. Spray-Stack's 4/78:83-herman Halpern Stack's 12/86-R.E. Five points sharper but a long scratch parallels the top line of the bust, the scratch made long ago and blends fairly well into the patina. On the face is a thin horizontal scratch. The reverse was struck from an injured die, the result being that the devices are blunted. Darkish steel brown. Purchased at the Fresno Coin Show in 1/71 by Robert E. Vail 11/21/88-Del Bland.

Strong date. Some of LIBERTY indistinct. However, although the reverse legend, the wreath, and denomination, are all plain. Three very minor rim bruises at the obverse rim above RTY and the color medium steel brown. The usual small surface abrasions consistent with a circulated Large Cent from the 18th century. Struck the year that George Washington died (he was 67 years old, three years shy of the biblical threescore and ten.).
